Inner Space Talk

why we need an *Inner Space Talk*

It is said of the human race that it is our *nature* to make war.
If it is, indeed, our natures that are lacking–
And five thousand wars in the last two-thousand years lends testament –
Then it follows as the sun follows the moon
That it is human nature we must transcend if the earth is to survive.
The question remains how: how do we change something we know so little about –
Not make a worse psychological prison for ourselves?

During the later part of the fifteenth century
Leonardo da Vinci had to sneak out in the middle of the night
And dig up corpses to study Human Anatomy:
The body was considered a holy vessel not to be messed with.
Five hundred years later, we are as insipid about the Human Psyche.

Until we dare to know at least as much about the human psyche
As we know about human anatomy
Our lives remain negligible.

Sundays 4:30~6:30
@ The Plaza Grill in Arcata
